

Home IMPROVEMENT

Turn over to discover our top tips for creating a conservatory and where to shop the best home office chairs

TOTALLY *floored*

Bored of plain flooring? Go all out and paint your very own unique design using Rust-Oleum's Chalky Finish Floor Paint, now available in 110 colours. Suitable for both wood and concrete flooring, the paint is designed with durability in mind, so you can rely on a smooth, scratch-free surface for years to come. Why not get the kids involved to create fun, colourful patterns, such as stars and swirls? Priced at £38.99 per 2.5L.

Light-bulb moment

Many of us now have smart home systems, but for maximum hands-free ease, you could add Trust's new Smart Home WiFi lighting products.

Whether you're at home or not, you can control your home's lighting by the app, or even by your voice, and you can implement timers so that all the lights turn on or off exactly when you need them to. Available at Amazon, priced from £16.99.

FEELING FRESH

Not only are we subjected to higher pollen counts during the summer, but the dry weather also increases the amount of dust in the air too. If either of these aggravate your allergies, you should consider an air purifier. Blueair's Blue 3210 model is smaller than typical purifiers yet can remove 99 per cent of airborne particles thanks to its 'HEPASilent' filtration technology – so you can enjoy fresh air indoors all year round. It comes with simple 'one-button' controls, is available in five on-trend colours and costs £159.

A WARM WELCOME

Create a standout stone-effect entranceway with Walls and Floors' latest Form collection. It includes a variety of large porcelain tiles that are extremely hard-wearing. All matt-finish tiles come with an R10 anti-slip surface and cost £19.95 per sq m.
